MINES AND MILLS

Two Big Strikes in Black Butte Mine

Big Ledge Carrying High Values Discovered-Means Much to Property in Northern Section.

Two strikes, one of greatest importance to the property, have been made on the Black Butte company's mine. A a point on the bold outcropping of the immense blow-out, pretty well up the bill, there has been exposed a wonderful showing. At this point the ore body is fully twenty-five feet in width and throughout it carries values ranging from \$80 to well over \$200 per ton. As frequently occurs, the discovery of this rich shoot was made by the merest accident, says the Goldfield News. Some months ago Mr. Ish prospected this portion of the cropping and encountered good values, although he had not broken into the richer section. The first tunnel was driven in a short distance to explore the territory, but was not advanced beneath the shoot. A few days ago, in crossing the dyke, W. S. Patrick, the general manager, noticed a good-looking piece of quartizite that was considerably honeycombed. Examining the same and the adjoining cropping he came across a big piece, weighing at least sixty pounds, one face of which shows large quantities of free gold scattered through the rock. This sample was brought downtown and has attracted a good deal of attention. Further prospecting has proved that the entire ledge—if such it may be called-carries good values, and that a great part of it will ship at a profit. The lower tunnel was driven to cuit at depth this ore body, but evidently it has dipped. It is now the purpose of the management to extend the tunnel to connect with the shaft and then continue the exploration work both for the extension of the Quartzite ledge and the ore shoot just discovered. Wonderful as the showing has been heretofore in this property, the latest developments are of most extraordinary importance and mean a great deal to the property, as well as the northern section of the district.

The other strike was made on the Black Buite No. 3 where a ledge has been exposed that is from twelve to fitteen feet wide and carries good milling values at turface. This occurred on Thursday and the find is being extensively explored. Beyond question the Black Buite is one of the wonders of this remarkable district, and in the near future will make a decidedly credita immense blow-out, pretty well up the bill, there has been exposed a wonderful

GOLDFIELD VINDICATOR SOLD.

Salt Lake Interests Sold to Denver Capitalists.

Claude M. Smith has purchased from J. B. Menardi the latter's entire interest in the Goldfield Vindicator Mining company. Mr. Menardi also resigns as director in favor of Mr. Smith. This completes the entire reorganization of the officers of that company. The interests of R. L. Colburn and W. S. Williams, purchased some sixty days ago by R. W. Griswold, were secured for J. H. Emerson of Denver, Colo., formerly superintendent of Stratton's Independence mine of Cripple Creek, and L. E. Spangler, who is an associate of Mr. Emerson's while E. E. Quentin of Denver purchased the stock of W. H. Tibbals, E. H. Aris et al. of Salt Lake City. R. W. Griswold still retains his original interest, says the Goldfield News.

The efficers now are: R. W. Griswold, president; E. E. Quentin, secretary; L. E. Spangler, treasurer, and Claude M. Smith. The main office has been transferred to Denver, Colo., at the Quentin Investment company, and the stock registered with the international Trust company of Denver, It is understood Mr. Granfield, the

It is understood Mr. Granfield, the

It is understood Mr. Granfield, the lucky lessee and prominent owner of the famous C. K. & N. mine of Cripple Creek, is heavily interested in the Goldfield Vindicator, baving been quietly buying outstanding stock, besides taking the entire 100,000 shares of treasury stock recently offered by the company. Patent surveys are now being made and work is to be started January I.

The advent of these people into Goldfield is taken as very significant. Besides the

The advent of these people into Goldfield is taken as very significant. Besides the Goldfield Vindicator, the Denver crowd mentioned made a \$10,000 cash payment on the Sunnyside group just between the Tin Horn and Blue Bull property of George Winkler, R. W. Griswold, A. E. Hall, Claude M. Smith and Rube Ryder, and organized the Sunnyside Gold Mining company, with R. W. Griswold president, L. E. Spangier vice-president and treasurer, E. E. Quentin secretary, A. E. Hall and George Winkler directors.

NEW HOISTING PLANTS.

Frisco Contact and the Lulu to Acquire Them.

Through Manager D. P. Rohlfing, the

Frisco Contact Co, has placed an order for a hoisting plant, to be used with a depth of 500 feet. The shaft will be double compartment, but it is the intention in time to put down four double compartment shafts, and work has already been started, the depths attained ranging from \$\frac{1}{2}\$ to 190 feet. The company has recently completed the

work of patenting its eighteen claims, which cover a north extension of the famous Horn Silver vein.

The Lulu Mining company, which has a group of claims on the south extension of the same vein, will also install a new hoisting plant.

GOOD SHOWING ON PHOENIX.

Lead Vein Has Yielded Over 8000 Tons.

During the year work has steadily progressed on the lead vein of the Phoenix gressed on the lead vein of the Phoenix mine with most satisfactory results, says the Bingham Bulletin. A large tonnage of ore is in sight, there being over seven feet exposed at breast of drift. The body shows 2½ feet of 60 per cent steel galena, and 5 feet of shipping and milling mixed carrying an average of 25 per cent lead. A shipment of the first-class is awaiting teams. Next spring Manager Gebhardi proposes to hit the market at a lively rate to the drift on this vein is in 2000 feet, and up to date has yielded over 8000 tons of profitable ore.

Boston Copper Market.

profitable ore

Special to The Tribune.

BOSTON, Mass., Dec. 29.—There were plenty of buying orders in the copper shares at the opening this morning, commission house brokers being quite active. The carly prices were very strong, but failed to hold, as the commission orders were soon illied up and then a reaction followed. There were again rumors on Amalgamated and Boston houses were reported heavy sellers in New York. This weakened Amalgamated and brought about an theasy feeling in the general copper share list. This resulted in bringing about quite a reaction throughout the whole list. There were stocks for sale all around, which caused the market to continue heavy until the close, with the feeling unsettled. Hornblower & Weeks, brokers, is State street, Boston, and 10 Wall street, New York, furnish the following quotations: Special to The Tribune

Year on 'Change Shows a Decline

Volume of Business Less and Material Decline in Values of Stocks Handled

The fall of the gavel which marked the end of the day's business on the mining exchange vesterday also marked the clos of the year's business, for there will be no call until Tuesday, January 3, 1905.

The totals for the years, as prepared by Secretary Shorten, show that 6,449,420% shares were dealt in during the year, and that their value is represented by the figures \$1.842,762.38. The figures of the previous year were 10,169,741 shares, valued nt \$6,165,233.13.

Comparison will show that there has been a great shrinkage, both in the amount of business and in the value of the shares handled. Particularly is this true in the last-named case, the decrease in value being out of all proportion to the crease in numbers. The decrease in value is in the neighbor-good of \$5,000,000.

The totals for the month were 621,531 shares, valued at \$179,519.87. During December of the previous year 525,693 shares were handled, but their value was \$256,-

co.11.

The week's totals were 148,745 shares, valued at \$39,442.77.

For the day, 26,400 shares were handled and their cash value was \$5712.38.

May Day was an active trader and sold down to 10½ cents on the open board during the atternoon.

New York was in demand around 27 cents.

Daly West was firm at \$12.25. The closing quotations were closing quotations were as

South Columbus Resumes Operations

Rumored That a Rich Find Has Been Made on Columbus Con. Property.

Word was received in the city yesterday to the effect that work has been resumed on the South Columbus at Alta, and it was also reported that a rich find has been made on the property of the Columbus Consolidated.

The South Columbus was closed down me time ago until arrangements could be completed to secure the air necessary to working the property. This air is now being furnished by the Columbus Consoli-dated, where a powerful air compressor has been installed. The air reaches the South Columbus through a pipe line.

Bingham Concentrates

Quite a number of new locations and relocations will be made next week.

The New Red Wing has been steadily worked
for some months and, it is stated, with very
satisfactory results.

Many of those who have assessment and
kindred work to do glanced off this week to
make merry and because of the disagreeably
cold weather.

J. J. Riley of Sait Lake has a promising
group of four claims in Dry fork, on which
probably considerable work will be done by a
company soon to be formed.

It is generally remarked, as plans come to
the surface, that the most sanguine figures
yet made have not reached Bingham's probable output during the list half of 1905.

There has been excellent sleighing all week,
and teamsters have taken advantage of it.
Little ore is coming down, but up freight
cannot be moved fast enough.

If a mill connection with the Red Wing Extension is not built next season it will send
more accumulations to a custorn mill. A large
tonnage has already been broken in pushing
developments.

developments.

The Sutler-Liberal contract for two years—
beginning January 1—is with the United States
Smelling company, instead of the American,
as stated last week Manager Jacobs is much
pleased with the terms, and there will be
comething doing at the Butler-Liberal in the
way of production.

Plans and specifications are being formulated Pinha and specifications are being formulated for a power plant for the Copper Bey and Great Divide mines, to be run by electricity from the Telluride or Clark line. They will not be installed until after the apring break-up, and possibly a consolidated plant will be used in common by the properties. A large showing of milling ore is reported.—Bingham Bulletin.

Concentrates-Uncle Sam mill, two

Ores and Bullion.

Ore and buillon settlements for yesterday amounted to \$110,500. As reported by McCornick & Co., they were as they follow: American buillon, \$43,500, gold bars, \$10,000, gold, silver and lead ores, \$55,900. Silver was quoted at \$15, cents per ounce copper at 14 cents per pound, lead at \$1.50 and \$4.60 per hundredweight.

Mining Notes.

A. J. McMullen of the Skylark of Beaver ounty left for that property last night A chierination mill is soon to be started at the Jumbo mine in the Buffalo Hump mining district of Idaho. The Big Cottonwood Gold and Copper Mining company is preparing to install a power plant and machine drills

W. E. Griffith, the well-known mining ex-pert, expects to leave for the Goldfield dis-trict in the near future.

George Gunn of the American Smelting and Refining company's staff has gone out to the digginss on one of his periodical trips. The Taylor & Brunton sampler reports the arrival of thirteen cars of ore from Tonopsh, three from Bingham and four from Tintic. A. B. Lewis will leave New York next Tues-day to be present at the opening session of the Legislature, of which he will be a mem-ber.

The ore and bullion settlements reported late yesterday afternoon were as follows: Crude ore and concentrates \$62,000, base bullion, \$99,-509, gold buillon, \$19,000.

The directors of the Columbus Consolidated Mining company are scheduled to have a meeting on January 7, at which time the campaign for next year will be outlined.

The acceptance of a position in County Clerk-elect Eldredge's office by W. H. Farnaworth will remove a complexous figure from the floor of the mining exchange. The Yampa smelter at Hingham is closed down for a few days in order to connect up down for a few days in order to connect up with some of the new equipment recently in-stalled. The Yamba will soon be in shape to out an important figure in the State's produc-tion of course.

Superintendent Gottfredson of the Gold Mountain Bovelopment company has advised local officials of the company has a distance of 130 feet in the tunnel now being driven he has encountered a fissure, ten feet in width. The vein was sampled and shows values of \$2.11 per ton.
